FROM COLLECTION TO FIREPLACE

Clear choices. Clear prices. A fit check before supply.

01

Choose the look.

Compare log textures or media, venting and controls. Keep the complete component selection together.

02

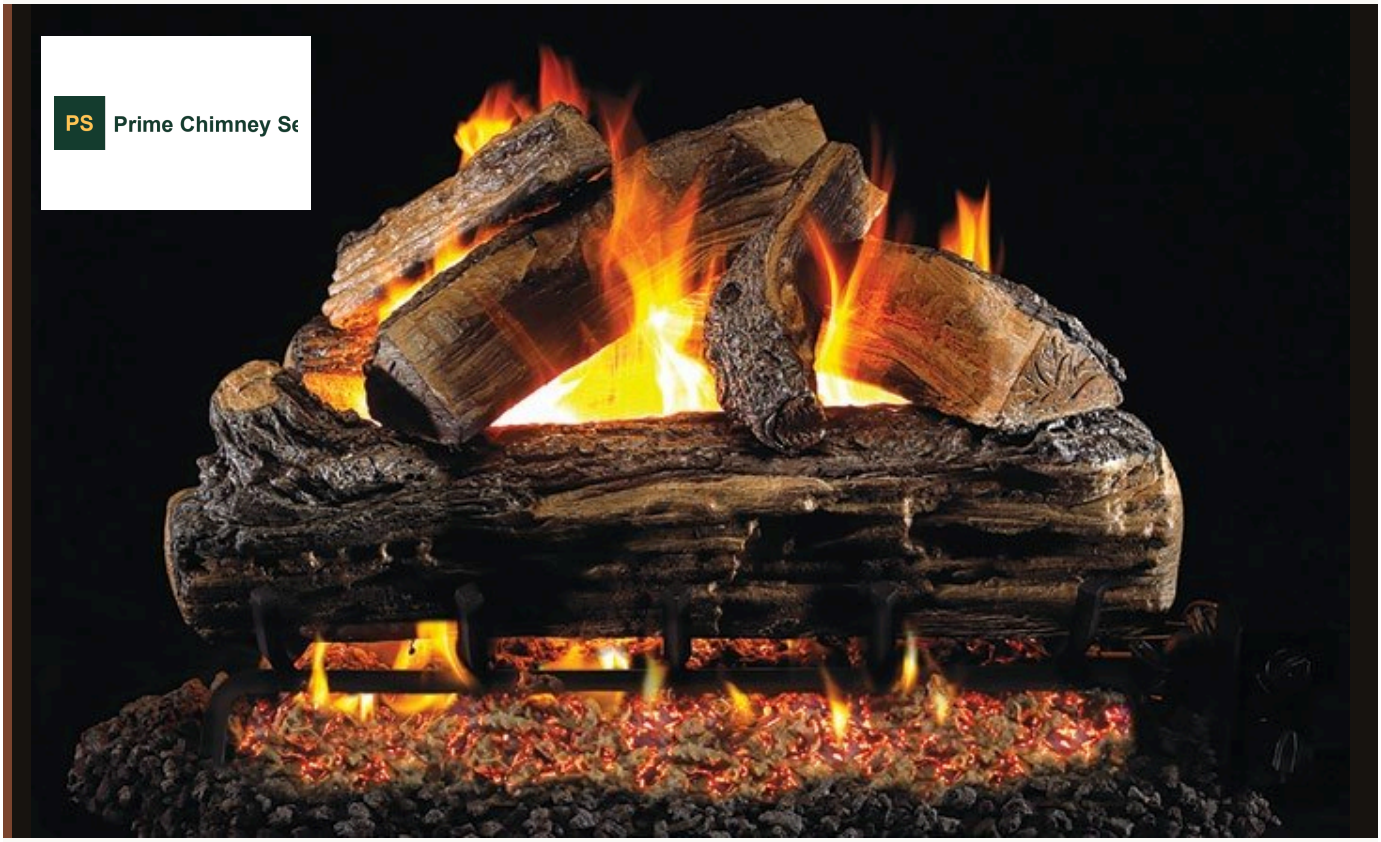

Review the fireplace.

We need dimensions, the appliance listing, fuel and required venting. Vent-free choices also need a room and local-rule review.

03

Confirm the full scope.

Supply, customer sales tax, delivery, installation and any additional work are confirmed before payment.
